SLINEX

Safety instructions

Read and keep that manual.

The device installation process should be carried out by the qualified specialists.

Use the device from the -40°C to $+50^{\circ}\text{C}$, always keep it within that temperature range.

Installation surface should be free from vibration and impact influence.

Keep this device far from open sources of heat, such as radiators, heaters, and ovens.

The device can be installed near other electronic equipment in case if the temperature of the environment does not exceed previously mentioned range.

The device should be protected from the direct influence of the natural phenomena, such as direct sunlight, rain or snow.

Don't use aggressive or abradant detergent for the device surface cleaning.

Use soft wet cloth or tissue to remove strong dirt.

Attention!

As a result of continuous upgrades and functionality improvements, technical characteristics of the device can be changed without any preliminary declaration.

This manual can contain some inaccuracy or misprint.

The owner reserves the right to make corrections to the information described in the user manual and device package.

Nature protection

Don't throw away the device with other industrial or nutritive trash if you see that symbol. Some regions have separation and recycling systems for the electronic equipment.

Connect with local authorities to receive information about recycling of electronic equipment for your region.

Rights and limitation of liability

All rights reserved. Any part of that document can not be published in any form, translated into other languages or reproduced in any way including electronic or mechanical.

Document recording and copying is strictly denied without owner permission.

1. Package

ML-40ID outdoor panel – 1 pc.	Rainshield – 1 pc.
Wall mounting bracket – 1 pc.	Connection wires – 3 pcs.
Power supply 12V / 1A – 1 pc.	Mounting screws and anchors – 1 pkg.
Wireless Mifare cards – 3 pcs.	User manual – 1 pc.

2. Specification

SENSOR TYPE	NIGHT BACKLIGHT
1/3" CMOS	Infrared, 1.5 meter distance
RESOLUTION	LOCK RELAY CONTINUOUS CURRENT
1920×1080 px.	2 A
VIDEO OUTPUT	POWER SUPPLY VOLTAGE
AHD 1080p (2 MP), AHD 720p (1 MP) or CVBS (PAL)	+12 V
VIEW ANGLE	POWER CONSUMPTION
120°	3 W in working mode
ADDITIONAL FUNCTIONS	INSTALLATION TYPE
Key password unlocking	Surface mount
Wireless Mifare card reader (13.56MHz)	DIMENSIONS
Fingerprint sensor	53×143×27 mm (without rainshield)
	WORKING TEMPERATURE
	–40 ... +50 °C

3. Description

- 1 Night infrared backlight
- 2 Microphone
- 3 Video camera
- 4 Mifare wireless card reader
- 5 Call button
- 6 Fingerprint sensor
- 7 Speaker (from the bottom side)
- 8 Numeric keyboard

4. Schematic diagram

5. Installation

Steps:

- 1) Take the wall mounting bracket from the kit and situate it 150-160 cm from the floor line;
- 2) Mark and drill two holes inside the wall;
- 3) Take two nuts from the kit and hammer them into the drilled holes;
- 4) Fix the wall mounting bracket using screws from the kit;
- 5) Connect all communication wires and fix the door panel on the wall mounting bracket by the screw from the bottom side.

6. Operation

- Outdoor panel supports up to 10 administrator and 90 user records. It uses multi unlock methods: IC cards, fingerprints or passwords. Total quantity of the records (IC cards + fingerprints + passwords) can be up to 100.
- In the factory default initial state, any IC card, fingerprint or password can open the door lock, connected to the outdoor panel.
- If the user inputs wrong password or enter invalid fingerprint or swipe invalid IC card more than 5 times in a row, the system will freeze for 90 seconds. User must input correct password after 90 seconds.
- When there is no operation for more than 5 seconds, the system will automatically enter the low-power mode. The user should tap any key of the numeric keypad or fingerprint zone to wake the system up.

6.1. Restore factory settings

Press and hold the "Reset" button on the back of the panel until you hear "Ding-Ding-Ding-Ding". You will hear a voice prompt "Press # key to confirm", "Press * key to return". Press "#" key to restore to the factory default settings. You will hear "Restore factory successful". All information will be removed from the outdoor panel memory and administrator password will be restored to default value. Panel will be automatically restarted.

Administrator default password: 123456.

6.2. Menu operation

In initial state, after waking up the panel, press "*" #, the user will hear "please verify administrator", enter administrator password (default administrator password is 123456), then press "#" to confirm. Please refer to the doorbell voice prompt to register administrator.

Administrator setting: press "1" to enter administrator settings;

User settings: press "2" to enter user settings;

System settings: press "3" to enter system settings;

System information: press "4" to enter system information.

6.3. Administrator settings

Add an administrator

After waking up the doorbell, press "*" #. The user will hear "please verify administrator", enter the administrator password, swipe the administrator IC card or press the administrator's fingerprint to enter the system menu, and then press "1" to enter administrator settings. Press "1" to add an administrator, and the user can add a new administrator by entering a new password, swiping a new IC card or entering a new fingerprint. The user can add up to 10 administrators, from number 1 to number 10.

Add an administrator IC card: when you hear "number 1, please enter a fingerprint, IC card or password", the user can swipe a new IC card in the card reader area. Voice prompt "IC card add successful" means that the card was added successfully.

Add an administrator password: after the user successfully adds the 1st administrator, user will hear "number 2, please enter a fingerprint, IC card or password". User can enter a new password, the number of digits in the password is not less than 6. Enter a new password, and press "#" key to confirm. 7. Video camera settings

Camera can work in three basic modes: AHD 1080p (2 MP) – default mode, AHD 720p (1 MP) or analog CVBS (PAL). While using high-resolution AHD modes, the monitor must maintain this type of signal, otherwise there will be no image on the monitor screen.

To switch video camera modes press and hold camera mode button during 5 seconds then release it to switch from the current mode to the next one in a such sequence:

AHD-H (1080P) → AHD-M (720P) → PAL → AHD-H (1080P) ...

8. Limited warranty

Manufacturer guarantees product normal functioning during the warranty period if the user keeps all safety instructions described in that manual.

Warranty period is 12 months from the moment of the product purchasing (warranty period could be extended up to 24 months or more, depending on the local regulations).

Warranty period allows user to make guarantee repair in cases when normal functioning of the product was violated by the fault of manufacturer and the user haven't offend transporting, installation and working conditions.

This limited warranty does not cover any damage to the product that results

from improper installation, accident, abuse, misuse, natural disaster, insufficient or excessive electrical supply, abnormal mechanical or environmental conditions, or any unauthorized disassembly, repair or modification.

Warranty void in such cases:

- the product was damaged by the fault of the customer;
- the product wasn't properly installed according recommendations from the manual;
- the sticker on the backside of the product was broken;
- the product was not used for its intended function.

This limited warranty covers only repair, replacement, refund or credit for defective products, as provided above. Manufacturer is not liable for, and does not cover under warranty, any damages or losses of any kind whatsoever resulting from loss of, damage to, or corruption of, content or data or any costs associated with determining the source of system problems or removing, servicing or installing products. This warranty excludes third party software, connected equipment or stored data. Manufacturer is therefore not liable for any losses or damage attributable to third party software, connected equipment or stored data.

In the event a product has been discontinued, manufacturer shall either repair the product, offer to replace it with a comparable product or provide a refund at the lesser of the purchase price or the product's current value.

Repaired or replacement products will continue to be covered by this limited warranty for the remainder of the original warranty term.
