Slinex unique features

PIP (Picture in Picture)

Simultaneous image display from the call panel and the connected surveillance camera.

Quadrator

Simultaneously observe the image from two call panels and two surveillance cameras.

IPS screen

A bright and vibrant image without distortion from any viewing angle.

AHD support with Crystal Pixel technology

Full HD provides the clearest image at any time of the day.

Advanced mechanical IR filter

Improved mechanical IR filter in the call panels that provides natural color reproduction during the day and the highest detailing of the image on the monitor at night.

Connection of the IP Cameras to an analog intercom

Now it is possible to integrate the analog AHD intercom into existing IP video surveillance system.

Perfect clear sound

Two 2-watt speakers produce clear and lush sound.
